

Pacific Northwest 7 Day Significant Fire Potential

Legend

Fire Environment (FEN) 4 levels

| | |
|------------------|--|
| Minimal | - The Overall Fire Environment suggests a very low risk for Large fires (less than 1% chance) |
| Normal | - The Overall Fire Environment suggests a <u>normal</u> risk for large fires (1 - 4% chance) |
| Elevated | - The Overall Fire Environment suggests a moderately high risk for large fires (5 - 19% chance) |
| High Risk | The risk for large fire(s) is very high (≥ 20%) Triggers: 1. ⚡ (Significant Lightning) 2. BEN (Critical Burn Environment) |

The assessment of the overall fire environment considers multiple factors including weather, lightning amount and fuel dryness. Large Fire probabilities are derived objectively via statistical methods. **High Risk** levels (≥ 20% probability of a large fire) are almost always due to significant lightning as burning conditions alone rarely result in a large fire probability much above about
